

Publications 2022

ANNALES ACADEMIAE SCIENTIARUM FENNICAE AASF

Annales Academiae Scientiarum Fennicae is a multidisciplinary publication series of the Finnish Academy of Science and Letters. The new series saw the light of the day in November 2022.

AASF promotes dialogue between scientific disciplines and disseminates current, up-to-date information on scientific questions and new challenges. The publication series is aimed at a wide audience: In addition to members of the Academy, their colleagues abroad and researchers in various fields, the target audience includes everyone interested in science and research.

Articles are accepted in Finnish, Swedish and English. The publication process includes peer review.

Publications in the series appear online twice a year and it is freely available at the [journal.fi](http://journal.fi/aasf) platform (*journal.fi/aasf*)

AASF 1/2022:

Juha-Antti Lamberg, Nooa Nykänen and Jarmo Taskinen: Economic Degrowth and the Collapse of Institutional Order: Theory and Propositions

Aleksi Vuorinen: Femtometreistä valovuosiin: neutronitähdet eksoottisen aineen laboratoriona

Juha Raitio: Oikeusvaltio ja oikeusvarmuus Euroopan unionissa

Heikki Tanila: Muistijälkien kirjoittaminen aivojen kovalevyllä unen aikana takkuilee Alzheimerin taudissa

Jutta Jokiranta: Miten pyhä teksti toimii?

Johan Bobacka: Analytisk kemi – några reflektioner

Louis J. Muglia et al.: Preventing Spontaneous Preterm Birth: Insights from Genomics

Markku Yli-Halla: Acid sulfate soils: A challenge for environmental sustainability
